BID CLARIFICATION NOTICE

RE: 3D ILLUMINATED SIGNAGE INSTALLATION – LÜDERITZ CAMPUS

Bidders are hereby informed that, following a site assessment at the NAMFI Lüderitz Campus, the originally proposed wall-mounted installation method for the 3D illuminated signage is no longer considered suitable due to the insufficient wall height and limited visibility from the surrounding approaches.

Accordingly, bidders are requested to take note of the following clarification and incorporate the same into their proposals:

1. INSTALLATION METHOD

The signage at the Lüderitz Campus shall be designed as a freestanding structure and not as a wall-mounted installation.

Bidders may propose either:

- A pole-mounted / pylon-type structure; or
- A freestanding signboard structure,

provided that the proposed solution adequately supports illuminated 3D, signage and ensures maximum visibility and structural stability.

2. VISIBILITY REQUIREMENT

The primary objective of the signage is visibility and institutional branding. Therefore, bidders must ensure that the proposed installation height and positioning provide clear visibility from approaching roads and campus access points.

3. STRUCTURAL AND MATERIAL REQUIREMENTS

Given the coastal environmental conditions in Lüderitz, all proposed structures and materials must be suitable for high wind conditions and corrosion exposure.

Bidders are therefore required to specify:

1996 - 2026

Celebrating 30 Years of Maritime Excellence

- Structural support system;
- Foundation requirements;
- Wind-load considerations;
- Corrosion-resistant materials and finishes;
- Illumination specifications suitable for outdoor coastal conditions.

4. ILLUMINATION

The signage shall remain illuminated and operational under outdoor conditions. All lighting components must be weatherproof and suitable for long-term external use.

5. DESIGN SUBMISSION

Bidders are encouraged to submit conceptual renderings or design illustrations indicating:

- Overall structure type;
- Approximate dimensions;
- Mounting method;
- Illumination concept; and
- Proposed materials.

This clarification shall form part of the bidding requirements and must be considered in the preparation of all submissions relating to the Lüderitz Campus signage installation.
